RESTORING SHROPSHIRE'S VERGES PROJECT :

Following a presentation by Restoring Shropshire Verges group at our parish council meeting the council agreed to set up group and a trial site in one location in the parish. Late 2022 the site was cleared, yellow rattle seed sown and the in spring 2023 we have planted out the plug plants and set some seed to see how the site progresses in summer 2023. We plan to identify further site(s) during the summer to clear and make a start on late summer / autumn.
